Why redesigning?

The Art Institute of Chicago (AIC) has a rich heritage of housing artistic and cultural treasures that have drawn a diverse array of visitors over the years. The Art Institute of Chicago (AIC) has long attracted a diverse audience, including tourists and students conducting field research. While existing AIC apps serve tourists well, they often miss the mark for students from School of the Art Institute from Chicago(SAIC) who visit more frequently and require specialized research tools.

Why is the current app not a good fit for students?

Tourist-Centric Design and Limited Content

Inadequate Support for Academic Inquiry

Existing App Analysis

S

Audio Descriptions For Selected Exhibits Can Enhance The Experience For Visually Impaired Visitors And Those Who Prefer Audio-Based Information.

The Inclusion Of Maps Aids In Navigation Within The Museum, Helping Users Locate Exhibits And Amenities.

The App Provides Up-To-Date Information On Current Exhibitions, Which Can Be Valuable For Art Students Conducting Research On Contemporary Artworks.

- AUDIO DESCRIPTIONS
- MAP FUNCTIONALITY
- CURRENT EXHIBITION INFORMATION

Evolving User Expectations And Preferences For Mobile Apps May Require The AIC App To Adapt And Stay Aligned With Emerging Trends.

Ongoing User Dissatisfaction With The App's Complexity And Limited Research Capabilities Could Result In Negative Reviews And Reduced Usage Among Visitors And Students.

- CHANGING USER EXPECTATIONS
- USER DISSATISFACTION

T

W

- LACK OF TEXTUAL DESCRIPTIONS
- LIMITED RESEARCH SUPPORT
- COMPLEX INTERFACE
- MANDATORY LOGIN

The Absence Of Textual Descriptions For Artworks Limits The Depth Of Information Available To Users, Particularly Art Students Conducting Field Research.

The App's Functions Are Primarily Geared Towards Tourists, Providing Minimal Support For Art Students Who Require More Comprehensive Research Tools.

The App's Complex Interface, Featuring Excessive Colors And Inconsistent Design, Can Confuse And Frustrate Users.

Only Have Single-Functionality And Often Necessitate User Logins, Creating Unnecessary Obstacles For Users.

- ENHANCED RESEARCH FEATURES
- IMPROVE INTERFACE
- INCORPORATING AR/VR

Developing Features Specifically Designed To Support Art Students In Their Research Efforts, Such As Detailed Written Descriptions And Research Tools

Streamlining The App's Interface Design, Reducing Visual Complexity, And Providing A More User-Friendly Experience

Exploring The Integration Of Elements To Help Art Students To Engage With The Artworks During Their Visit
